Books a la Carte for Physics: Concepts and Connections (5th Edition)

Art Hobson

Books a la Carte for Physics: Concepts and Connections (5th Edition) Art Hobson

This edition features the exact same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books à la Carte also offer a great value—this format costs 35% less than a new textbook.

Written for the non-science major, this text emphasizes modern physics and the scientific process—and engages you by drawing connections between physics and everyday experience. Hobson takes a conceptual approach, with an appropriate focus on quantitative skills. The Fifth Edition increases coverage of key environmental topics such as global warming and energy, and adds new topics such as momentum. Hobson's text remains the least expensive textbook available for students taking nonmajors physics.
