Diseases of the Ear Stuart R. Mawson

The 6th edition of this well-established textbook is essential reading for postgraduates studying for the otolaryngology specialty exams, giving all the necessary information for otologists in training within a single volume. For the first time the book includes material from an international team of authors, all of whom are acknowledged experts in the field.

Every topic has been brought fully up to date, with much more detailed information about tinnitus, cochlear implants, diagnostic imaging, secretory otitis media, and Eustachian tube function, amongst other topics. The book also features new material on otoacoustic emissions and bone-anchored hearing aids.

Rigorously edited by distinguished editors Harold Ludman and Tony Wright, this 6th edition contains approximately 90% new material, including over 450 illustrations, of which 45 will be presented in colour. The book is published in a larger format and the text displayed in a fresh new design to make this classic reference title an invaluable companion for trainees throughout their years of otological training.
