The Ecology of Nusa Tenggara and Maluku presents, for the first time within one cover, extensive baseline data on the region's natural history, peoples, ecosystems, biodiversity, and land-use. It discusses these in historical context, as well as in the context of the socio-economic development of the region. Highly illustrated, and accessible to any reader with an interest in the region, it also provides guidelines to scientific researchers on worthwhile ecological and socio-economic research projects. It will be invaluable to all individuals involved in development planning and environmental management within the region.
