Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) Zhiang (John) Lin, Kathleen M. Carley

Designing Stress Resistant Organizations demonstrates, in a persuasive way, how computational organization theory can be applied to advance the field of management with its successful integration of theory and practice.

At the theoretical level, the book contains a comprehensive computational framework called DYCORN, which simulates dynamic and interactive organizational behaviors by incorporating multiple factors such as organizational design, task environment, and stress, and which generates consistent and insightful propositions on organizational performance.

The book utilizes an organization science based approach to computational modeling. This approach recognizes the limit of human cognition as it was outlined by Herbert A. Simon in 1947. The model strives to focus on the essence of the reality that is most relevant to the research issue. This approach has been proven to be more beneficial for us to understand the underlying dynamics of the phenomenon.

From reader reviews:

John Jacquez:

Now a day people who Living in the era wherever everything reachable by talk with the internet and the resources in it can be true or not call for people to be aware of each information they get. How a lot more to be smart in getting any information nowadays? Of course the correct answer is reading a book. Reading a book can help folks out of this uncertainty Information specially this Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) book as this book offers you rich facts and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it you probably know this.

Robert Hester:

Your reading sixth sense will not betray you actually, why because this Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) guide written by well-known writer whose to say well how to make book that may be understand by anyone who read the book. Written in good manner for you, leaking every ideas and producing skill only for eliminate your current hunger then you still uncertainty Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) as good book not simply by the cover but also by the content. This is one book that can break don't judge book by its protect, so do you still needing an additional sixth sense to pick this specific!? Oh come on your looking at sixth sense already alerted you so why you have to listening to another sixth sense.

Heather Delph:

This Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) is great e-book for you because the content which is full of information for you who all always deal with world and possess to make decision every minute. This book reveal it details accurately using great manage word or we can claim no rambling sentences included. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but difficult core information with splendid delivering sentences. Having Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series) in your hand like keeping the world in your arm, info in it is not ridiculous a single. We can say that no publication that offer you world inside ten or fifteen moment right but this e-book already do that. So , this can be good reading book. Hey there Mr. and Mrs. active do you still doubt that?

Thomas White:

What is your hobby? Have you heard which question when you got scholars? We believe that that question was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. So you know

that little person including reading or as studying become their hobby. You should know that reading is very important along with book as to be the issue. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You get good news or update about something by book. Numerous books that can you go onto be your object. One of them is niagra Designing Stress Resistant Organizations: Computational Theorizing and Crisis Applications (Information and Organization Design Series).
