William Stallings

Local and Metropolitan Area Networks (6th Edition) William Stallings

This book provides up-to-date coverage of LAN technology and LAN standards, and will enhance readers' understanding of computer networks — for purposes of managing the system, solving users' problems, and planning for future growth related to a company's products and sales. Chapter topics include data communications, topologies and transmission media, protocol architecture, Gigabit Ethernet, 100-Mbps token ring, Fibre Channel, ATM LANs, wireless LANs, concepts of bridges and routers, network management, and structured cabling systems and types. For product development and marketing personnel, and data processing personnel.
