Joined by an international team of experts in the field, Caplan offers a widened coverage of each chapter topic, illustrated by using a large number of real-world clinical examples. Not previously included, this new edition now also contains a chapter on the genetics of stroke. Generously illustrated by figures of anatomy and pathology and brain and vascular imaging, this is a must-have for medical specialists and consultants as well as trainees, in neurology, stroke medicine, internal medicine, and neurorehabilitation.
