1972 - Nakagin Capsule Tower

1972 - Nakagin Capsule Tower

Winner of the 2015 Deutsches Architekturmuseum Book Award

Completed in the year 1972, Kisho Kurokawa's Nakagin Capsule Tower is one of the few visionary proposals realized by an avant-garde architectural movement called Metabolism. An experimental apartment complex designed with 140 removable capsules, this building in Tokyo embodies the future of urban living as envisioned by Kurokawa at that moment in postwar Japan. In recent years, the building has faced the threat of demolition to make way for a more conventional structure. In this first monograph, artist Noritaka Minami uses photography to document the current state of the capsules as a response to their potential disappearance.
