Mathematical Models in Cell Biology and Cancer Chemotherapy (Lecture Notes in Biomathematics)

M. Eisen

The purpose of this book is to show how mathematics can be applied to improve cancer chemotherapy. Unfortunately, most drugs used in treating cancer kill both normal and abnormal cells. However, more cancer cells than normal cells can be destroyed by the drug because tumor cells usually exhibit different growth kinetics than normal cells. To capitalize on this last fact, cell kinetics must be studied by formulating mathematical models of normal and abnormal cell growth. These models allow the therapeutic and harmful effects of cancer drugs to be simulated quantitatively. The combined cell and drug models can be used to study the effects of different methods of administering drugs. The least harmful method of drug administration, according to a given criterion, can be found by applying optimal control theory. The prerequisites for reading this book are an elementary knowledge of ordinary differential equations, probability, statistics, and linear algebra. In order to make this book self-contained, a chapter on cell biology and a chapter on control theory have been included. Those readers who have had some exposure to biology may prefer to omit Chapter I (Cell Biology) and only use it as a reference when required. However, few biologists have been exposed to control theory. Chapter 7 provides a short, coherent and comprehensible presentation of this subject. The concepts of control theory are necessary for a full understanding of Chapters 8 and 9.

From reader reviews:

Howard Depriest:

Do you considered one of people who can't read pleasant if the sentence chained in the straightway, hold on guys this aren't like that. This Mathematical Models in Cell Biology and Cancer Chemotherapy (Lecture Notes in Biomathematics) book is readable by you who hate the perfect word style. You will find the info here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to offer to you. The writer of Mathematical Models in Cell Biology and Cancer Chemotherapy (Lecture Notes in Biomathematics) content conveys thinking easily to understand by most people. The printed and e-book are not different in the information but it just different such as it. So , do you nevertheless thinking Mathematical Models in Cell Biology and Cancer Chemotherapy (Lecture Notes in Biomathematics) is not loveable to be your top collection reading book?

Virginia Gauvin:

Hey guys, do you really wants to finds a new book to study? May be the book with the concept Mathematical Models in Cell Biology and Cancer Chemotherapy (Lecture Notes in Biomathematics) suitable to you? The actual book was written by well known writer in this era. Often the book untitled Mathematical Models in Cell Biology and Cancer Chemotherapy (Lecture Notes in Biomathematics)is a single of several books which everyone read now. This book was inspired many people in the world. When you read this e-book you will enter the new way of measuring that you ever know just before. The author explained their plan in the simple way, so all of people can easily to know the core of this book. This book will give you a wide range of information about this world now. To help you to see the represented of the world within this book.

Faye Michaels:

The publication untitled Mathematical Models in Cell Biology and Cancer Chemotherapy (Lecture Notes in Biomathematics) is the publication that recommended to you you just read. You can see the quality of the reserve content that will be shown to you actually. The language that article author use to explained their way of doing something is easily to understand. The author was did a lot of exploration when write the book, therefore the information that they share for you is absolutely accurate. You also might get the e-book of Mathematical Models in Cell Biology and Cancer Chemotherapy (Lecture Notes in Biomathematics) from the publisher to make you a lot more enjoy free time.

Mattie Priest:

Reading can called thoughts hangout, why? Because if you are reading a book mainly book entitled Mathematical Models in Cell Biology and Cancer Chemotherapy (Lecture Notes in Biomathematics) the mind will drift away trough every dimension, wandering in every aspect that maybe not known for but surely might be your mind friends. Imaging each word written in a e-book then become one web form conclusion and explanation that will maybe you never get ahead of. The Mathematical Models in Cell Biology and

Cancer Chemotherapy (Lecture Notes in Biomathematics) giving you an additional experience more than blown away your mind but also giving you useful info for your better life on this era. So now let us present to you the relaxing pattern is your body and mind are going to be pleased when you are finished looking at it, like winning a. Do you want to try this extraordinary shelling out spare time activity?
