The Strategic Distribution Management Initiative And Its Effects On Inventory Levels And Readiness

Jeffrey A. Schmidt, Devon D. NuDelman

This is a NAVAL POSTGRADUATE SCHOOL MONTEREY CA report procured by the Pentagon and made available for public release. It has been reproduced in the best form available to the Pentagon. It is not spiral-bound, but rather assembled with Velobinding in a soft, white linen cover. The Storming Media report number is A910114. The abstract provided by the Pentagon follows: Until just a few years ago no organization was tasked with measuring overall effectiveness design or optimization of DOD's global supply chain management system. As a result, the Strategic Distribution Management Initiative (SDMI) was created as a joint venture between Defense Logistics Agency (DLA) and the United States Transportation Command (USTRANSCOM) charged with enterprise level redesign, streamlining, and optimization of the DOD global supply chain. This thesis examines the affects of the SDMI implementation on the Army's two maneuver divisions stationed in Europe. Specifically, it analyzes affects of SDMI implementation on the eight supply support activities located within the two maneuver divisions in USAREUR.
