Environmental Engineering in the Process Plant

Environmental Engineering in the Process Plant

Here is a unique compendium of 36 outstanding articles from the pages of Chemical Engineering magazine. Produced in a large format with numerous illustrations and tables, this book enables engineers to keep current on major changes in environmental engineering in the chemical process plant. The articles, written by industry experts, cover problems and solutions for airborne pollutants, liquid pollutants, and other environmental hazards. Safety issues, the handling of toxic materials, and hazardous waste disposal and storage are emphasized throughout. Critical topics covered include sealing off fugitive emissions... scrubbing toxic inorganics... cleaning up NOX emissions... ridding aqueous streams of VOCs... making wastewater less toxic... hazard communication... and managing your environmental audit.
