What's Happening in the Mathematical Sciences, 2001-2002

Barry Cipra

What's Happening in the Mathematical Sciences, 2001-2002 Barry Cipra

Mathematicians like to point out that mathematics is universal. In spite of this, most people continue to view it as either mundane (balancing a checkbook) or mysterious (cryptography). This fifth volume of the "What's Happening" series contradicts that view by showing that mathematics is indeed found everywhere - in science, art, history, and our everyday lives. Here is some of what you'll find in this volume:

Mathematics and Science: Mathematical biology - Mathematics was key to cracking the genetic code. Now, new mathematics is needed to understand the three-dimensional structure of the proteins produced from that code; Celestial mechanics and cosmology - New methods have revealed a multitude of solutions to the three-body problem. And other new work may answer one of cosmology's most fundamental questions: What is the size and shape of the universe? Mathematics and Everyday Life: Traffic jams - New models are helping researchers understand where traffic jams come from-and maybe what to do about them; Small worlds - Researchers have found a short distance from theory to applications in the study of small world networks. Elegance in Mathematics: Beyond Fermat's Last Theorem - Number theorists are reaching higher ground after Wiles' astounding 1994 proof: new developments in the elegant world of elliptic curves and modular functions; The Millennium Prize Problems - The Clay Mathematics Institute has offered a million dollars for solutions to seven important and difficult unsolved problems. These are just some of the topics of current interest that are covered in this latest volume of "What's Happening in the Mathematical Sciences". The book has broad appeal for a wide spectrum of mathematicians and scientists, from high school students through advanced-level graduates and researchers.

From reader reviews:

William McNally:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each book has different aim or even goal; it means that guide has different type. Some people truly feel enjoy to spend their time and energy to read a book. They are reading whatever they have because their hobby is usually reading a book. Think about the person who don't like studying a book? Sometime, man feel need book if they found difficult problem or exercise. Well, probably you will want this What's Happening in the Mathematical Sciences, 2001-2002.

Sophia Myers:

Book is actually written, printed, or descriptive for everything. You can realize everything you want by a reserve. Book has a different type. As we know that book is important point to bring us around the world. Adjacent to that you can your reading talent was fluently. A guide What's Happening in the Mathematical Sciences, 2001-2002 will make you to become smarter. You can feel more confidence if you can know about almost everything. But some of you think this open or reading some sort of book make you bored. It is not necessarily make you fun. Why they are often thought like that? Have you searching for best book or appropriate book with you?

Pearl Minjares:

Book is to be different per grade. Book for children until eventually adult are different content. As you may know that book is very important for us. The book What's Happening in the Mathematical Sciences, 2001-2002 ended up being making you to know about other understanding and of course you can take more information. It is very advantages for you. The e-book What's Happening in the Mathematical Sciences, 2001-2002 is not only giving you far more new information but also to become your friend when you truly feel bored. You can spend your own personal spend time to read your reserve. Try to make relationship while using book What's Happening in the Mathematical Sciences, 2001-2002. You never sense lose out for everything if you read some books.

Kaci Carter:

A lot of people always spent their particular free time to vacation or even go to the outside with them family members or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, as well as playing video games all day long. If you wish to try to find a new activity this is look different you can read the book. It is really fun for you personally. If you enjoy the book that you read you can spent all day every day to reading a guide. The book What's Happening in the Mathematical Sciences, 2001-2002 it is rather good to read. There are a lot of people that recommended this book. These were enjoying reading this book. If you did not have enough space bringing this book you can buy the e-book. You can m0ore very easily to read this book out of your smart phone. The price is not too costly but this book has high quality.
