Formulating and solving Warehouse location problems: Approach for finding optimal solution to the well known NP- Hard problem Priyanka Verma

Warehouse location problem (WLP) is a variant of the well known facility location problem. It is about taking a decision to choose warehouses amongst a set of known locations between plants and markets, such that total cost of location and transportation is minimized. WLP is formulated as Mixed Integer Programming (MIP) problem. Three variants of WLP have been attempted in this work by varying the capacity considerations and changing the warehouse echelons. These variants are Single Stage Uncapacitated Warehouse Location Problem (SSUWLP), Single Stage Capacitated Warehouse Location Problem (SSCWLP), and Two Stage Capacitated Warehouse Location Problem (TSCWLP). These variants being NP-hard, obtaining optimal solution in practical time is difficult. The book aims to derive better method to attempt these problems by developing new solution approaches and better relaxations, which are used in branch-and-bound to get the optimal solution. The computational experiences of a large variety of small and large problems are analyzed. A key features of this work is an extensively studied literature of WLP. This book should help those who are working in the location problems or MIP problems.

From reader reviews:

Catherine Walters:

Book is written, printed, or highlighted for everything. You can understand everything you want by a book. Book has a different type. As it is known to us that book is important factor to bring us around the world. Next to that you can your reading skill was fluently. A publication Formulating and solving Warehouse location problems: Approach for finding optimal solution to the well known NP- Hard problem will make you to always be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that open or reading some sort of book make you bored. It isn't make you fun. Why they can be thought like that? Have you in search of best book or appropriate book with you?

The data you get based on what kind of guide you read, if you want have more knowledge just go with schooling books but if you want experience happy read one together with theme for entertaining such as comic or novel. Often the Formulating and solving Warehouse location problems: Approach for finding optimal solution to the well known NP- Hard problem is kind of publication which is giving the reader unforeseen experience.

David Lau:

Can you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try and pick one book that you just dont know the inside because don't determine book by its protect may doesn't work here is difficult job because you are scared that the inside maybe not as fantastic as in the outside appear likes. Maybe you answer may be Formulating and solving Warehouse location problems: Approach for finding optimal solution to the well known NP- Hard problem why because the fantastic cover that make you consider with regards to the content will not disappoint you. The inside or content is fantastic as the outside or even cover. Your reading sixth sense will directly guide you to pick up this book.

Linda Manning:

Many people said that they feel bored stiff when they reading a reserve. They are directly felt it when they get a half elements of the book. You can choose the particular book Formulating and solving Warehouse location problems: Approach for finding optimal solution to the well known NP- Hard problem to make your personal reading is interesting. Your current skill of reading proficiency is developing when you just like reading. Try to choose simple book to make you enjoy to learn it and mingle the impression about book and studying especially. It is to be first opinion for you to like to open up a book and learn it. Beside that the reserve Formulating and solving Warehouse location problems: Approach for finding optimal solution to the well known NP- Hard problem can to be your brand new friend when you're experience alone and confuse

with the information must you're doing of their time.
