**Writing Projects for Mathematics Courses: Crushed Clowns, Cars & Coffee to Go** Annalisa Crannell, Gavin LaRose, Thomas Ratliff

This volume is a collection of writing projects suitable in a wide range of undergraduate mathematics courses, from a survey of mathematics to differential equations. The projects vary in their level of difficulty and in the mathematics that they require, but are similar in the mode of presentation and use of applications. Students see these problems as real in a way that textbooks problems are not, even though many of the characters involved (dime-store detectives and CEOs) are obviously fictional. The stories are sometimes fanciful and sometimes grounded in standard scientific applications, but the mere existence of the story draws the students in and makes the problem relevant.

The book is the combined effort of four instructors who have used writing projects in their own courses. They provide an easy-to-use, widely applicable set of course materials that instructors can adopt and adapt to their own courses.

An extensive set of class-tested projects is included along with:

- implementation notes which highlight student difficulties,
- information about project solutions, and
- advice for grading writing projects.

### **From reader reviews:**

#### **Theresa Piercy:**

In this 21st century, people become competitive in every way. By being competitive today, people have to do something to make themselves survive, being in the middle of the actual crowded place and notice by means of their surroundings. One thing that occasionally many people have underestimated the importance of is reading. Yes, by reading a reserve your ability to survive boost then having chance to endure than other is high. For you personally who want to start reading a new book, we give you this specific Writing Projects for Mathematics Courses: Crushed Clowns, Cars & Coffee to Go book as beginner and daily reading guide. Why, because this book is more than just a book.

#### **Vickie Kay:**

Do you among people who can't read satisfying if the sentence chained in the straightway, hold on guys this aren't like that. This Writing Projects for Mathematics Courses: Crushed Clowns, Cars & Coffee to Go book is readable by simply you who hate those perfect word style. You will find the information here are arranged for enjoyable examining experience without leaving possibly decrease the knowledge that want to supply to you. The writer connected with Writing Projects for Mathematics Courses: Crushed Clowns, Cars & Coffee to Go content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the content but it just different in the form of it. So, do you nonetheless thinking Writing Projects for Mathematics Courses: Crushed Clowns, Cars & Coffee to Go is not loveable to be your top listing reading book?

#### **Corinne Schlegel:**

With this era which is the greater man or woman or who has ability in doing something more are more special than other. Do you want to become one of it? It is just simple solution to have that. What you must do is just spending your time very little but quite enough to experience a look at some books. On the list of books in the top list in your reading list is actually Writing Projects for Mathematics Courses: Crushed Clowns, Cars & Coffee to Go. This book that is qualified as The Hungry Hillside can get you closer in turning out to be precious person. By looking upward and review this reserve you can get many advantages.

#### **James Bouchard:**

A lot of e-book has printed but it differs. You can get it by internet on social media. You can choose the most effective book for you, science, amusing, novel, or whatever by means of searching from it. It is referred to as of book Writing Projects for Mathematics Courses: Crushed Clowns, Cars & Coffee to Go. You'll be able to your knowledge by it. Without making the printed book, it may add your knowledge and make you happier to read. It is most essential that, you must aware about e-book. It can bring you from one location to other place.
