Computable Foundations for Economics (Routledge Advances in Experimental and Computable Economics) K. Vela Velupillai

Computable Foundations for Economics is a unified collection of essays, some of which are published here for the first time and all of which have been updated for this book, on an approach to economic theory from the point of view of algorithmic mathematics. By algorithmic mathematics the author means computability theory and constructive mathematics. This is in contrast to orthodox mathematical economics and game theory, which are formalised with the mathematics of real analysis, underpinned by what is called the ZFC formalism, i.e., set theory with the axiom of choice. This reliance on ordinary real analysis and the ZFC system makes economic theory in its current mathematical mode completely non-algorithmic, which means it is numerically meaningless.

The book provides a systematic attempt to dissect and expose the non-algorithmic content of orthodox mathematical economics and game theory and suggests a reformalization on the basis of a strictly rigorous algorithmic mathematics. This removes the current schizophrenia in mathematical economics and game theory, where theory is entirely divorced from algorithmic applicability – for experimental and computational exercises.

The chapters demonstrate the uncomputability and non-constructivity of core areas of general equilibrium theory, game theory and recursive macroeconomics. The book also provides a fresh look at the kind of behavioural economics that lies behind Herbert Simon's work, and resurrects a role for the noble classical traditions of induction and verification, viewed and formalised, now, algorithmically. It will therefore be of particular interest to postgraduate students and researchers in algorithmic economics, game theory and classical behavioural economics.

From reader reviews:

James Boyd:

Information is provisions for anyone to get better life, information currently can get by anyone in everywhere. The information can be a information or any news even restricted. What people must be consider while those information which is within the former life are challenging be find than now is taking seriously which one works to believe or which one the particular resource are convinced. If you receive the unstable resource then you have it as your main information it will have huge disadvantage for you. All those possibilities will not happen in you if you take Computable Foundations for Economics (Routledge Advances in Experimental and Computable Economics) as your daily resource information.

James Kostka:

Reading a e-book can be one of a lot of pastime that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a publication will give you a lot of new info. When you read a book you will get new information due to the fact book is one of various ways to share the information or even their idea. Second, examining a book will make you more imaginative. When you reading through a book especially hype book the author will bring someone to imagine the story how the people do it anything. Third, it is possible to share your knowledge to other individuals. When you read this Computable Foundations for Economics (Routledge Advances in Experimental and Computable Economics), you are able to tells your family, friends as well as soon about yours e-book. Your knowledge can inspire different ones, make them reading a e-book.

Denise Dennis:

Reading a publication tends to be new life style with this era globalization. With looking at you can get a lot of information that will give you benefit in your life. Having book everyone in this world may share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their particular reader with their story or maybe their experience. Not only the storyline that share in the guides. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors these days always try to improve their ability in writing, they also doing some analysis before they write with their book. One of them is this Computable Foundations for Economics (Routledge Advances in Experimental and Computable Economics).

Erica Lewis:

Many people spending their period by playing outside together with friends, fun activity together with family or just watching TV all day every day. You can have new activity to enjoy your whole day by examining a book. Ugh, do you think reading a book really can hard because you have to use the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Touch screen phone. Like

Computable Foundations for Economics (Routledge Advances in Experimental and Computable Economics) which is finding the e-book version. So , why not try out this book? Let's see.
