Special Topic Issue: Developmental Neuroscience 2001, Vol. 23, No. 3 The immature brain is vulnerable to a number of prenatal and early postnatal stresses, such as maternal infection and birth asphyxia, which produce permanent damage and serious neurologic dysfunction in the survivors. The papers in this special issue of Developmental Neuroscience represent current clinical and basic science research into the pathophysiology of perinatal brain injury. The neurologic dysfunction that results from perinatal injury depends on developmental stage, as well as the type, severity, and duration of the insult. Basic mechanisms of normal cerebral development thus form the background for the interpretation of subsequent injury. Information obtained from human infants, combined with that from several experimental animal models, highlight the interaction of hypoxia-ischemia, excitotoxicity, oxidative stress, seizures, and inflammation, on the pathophysiology of perinatal brain injury and ultimate neurologic outcome. This special issue will be of interest to all developmental neuroscientists, both clinical and basic, who are involved in the study of the immature nervous system, its vulnerability in hypoxic-ischemic, inflammatory, or excitotoxic injury, and the consequences for neurologic development. As the studies reported will impact obstetrical and neonatal care, this issue will also be of interest to obstetricians and neonatologists.

**From reader reviews:**

**Ida Torres:**

Information is provisions for individuals to get better life, information presently can get by anyone at everywhere. The information can be a understanding or any news even an issue. What people must be consider any time those information which is inside the former life are difficult to be find than now's taking seriously which one is suitable to believe or which one the particular resource are convinced. If you get the unstable resource then you get it as your main information you will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Perinatal Brain Injury: 2nd Hershey Conference on Developmental Cerebral Blood Flow and Metabolism, Hershey, Pa., June 2000: Proceedings and Abstracts (DEVELOPMENTAL NEUROSCIENCE) as the daily resource information.

**Charles Anderson:**

People live in this new day of lifestyle always try to and must have the extra time or they will get great deal of stress from both everyday life and work. So , whenever we ask do people have time, we will say absolutely without a doubt. People is human not just a robot. Then we consult again, what kind of activity are there when the spare time coming to a person of course your answer will certainly unlimited right. Then do you try this one, reading publications. It can be your alternative with spending your spare time, often the book you have read will be Perinatal Brain Injury: 2nd Hershey Conference on Developmental Cerebral Blood Flow and Metabolism, Hershey, Pa., June 2000: Proceedings and Abstracts (DEVELOPMENTAL NEUROSCIENCE).

**Jordan Miller:**

You could spend your free time to learn this book this reserve. This Perinatal Brain Injury: 2nd Hershey Conference on Developmental Cerebral Blood Flow and Metabolism, Hershey, Pa., June 2000: Proceedings and Abstracts (DEVELOPMENTAL NEUROSCIENCE) is simple to develop you can read it in the park, in the beach, train and also soon. If you did not include much space to bring often the printed book, you can buy the particular e-book. It is make you better to read it. You can save typically the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

**Richard Vedder:**

Some people said that they feel uninterested when they reading a reserve. They are directly felt the idea when they get a half elements of the book. You can choose typically the book Perinatal Brain Injury: 2nd Hershey Conference on Developmental Cerebral Blood Flow and Metabolism, Hershey, Pa., June 2000: Proceedings and Abstracts (DEVELOPMENTAL NEUROSCIENCE) to make your current reading is interesting. Your current skill of reading skill is developing when you such as reading. Try to choose very simple book to make you enjoy you just read it and mingle the idea about book and reading especially. It is

to be 1st opinion for you to like to open up a book and study it. Beside that the reserve Perinatal Brain Injury: 2nd Hershey Conference on Developmental Cerebral Blood Flow and Metabolism, Hershey, Pa., June 2000: Proceedings and Abstracts (DEVELOPMENTAL NEUROSCIENCE) can to be a newly purchased friend when you're experience alone and confuse with what must you're doing of the time.
