An Introduction to Graphene Plasmonics

Paulo Andre Dias Goncalves, Nuno Miguel Machado Reis Peres

An Introduction to Graphene Plasmonics Paulo Andre Dias Goncalves, Nuno Miguel Machado Reis Peres
This book is meant as an introduction to graphene plasmonics and aims at the advanced undergraduate and graduate students entering the field of plasmonics in graphene. In it different theoretical methods are introduced, starting with an elementary description of graphene plasmonics and evolving towards more advanced topics. This book is essentially self-contained and brings together a number of different topics about the field that are scattered in the vast literature. The text is composed of eleven chapters and of a set of detailed appendices. It can be read in two different ways: Reading only the chapters to get acquainted with the field of plasmonics in graphene or reading the chapters and studying the appendices to get a working knowledge of the topic. The study of the material in this book will bring the students to the forefront of the research in this field.

Readership: Advanced undergraduate and graduate students entering the field of graphene plasmonics.
