Data Analysis Using Regression and Multilevel/Hierarchical Models (Analytical Methods for Social Research) Andrew Gelman, Jennifer Hill

Data Analysis Using Regression and Multilevel/Hierarchical Models, first published in 2007, is a comprehensive manual for the applied researcher who wants to perform data analysis using linear and nonlinear regression and multilevel models. The book introduces a wide variety of models, whilst at the same time instructing the reader in how to fit these models using available software packages. The book illustrates the concepts by working through scores of real data examples that have arisen from the authors' own applied research, with programming codes provided for each one. Topics covered include causal inference, including regression, poststratification, matching, regression discontinuity, and instrumental variables, as well as multilevel logistic regression and missing-data imputation. Practical tips regarding building, fitting, and understanding are provided throughout.

From reader reviews:

Eleanor Landa:

Inside other case, little folks like to read book Data Analysis Using Regression and Multilevel/Hierarchical Models (Analytical Methods for Social Research). You can choose the best book if you like reading a book. Provided that we know about how is important any book Data Analysis Using Regression and Multilevel/Hierarchical Models (Analytical Methods for Social Research). You can add information and of course you can around the world by the book. Absolutely right, simply because from book you can learn everything! From your country till foreign or abroad you will end up known. About simple matter until wonderful thing you may know that. In this era, you can open a book as well as searching by internet gadget. It is called e-book. You need to use it when you feel bored stiff to go to the library. Let's learn.

Helen Wright:

This Data Analysis Using Regression and Multilevel/Hierarchical Models (Analytical Methods for Social Research) is great guide for you because the content which is full of information for you who all always deal with world and still have to make decision every minute. That book reveal it facts accurately using great plan word or we can declare no rambling sentences included. So if you are read it hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but tricky core information with attractive delivering sentences. Having Data Analysis Using Regression and Multilevel/Hierarchical Models (Analytical Methods for Social Research) in your hand like obtaining the world in your arm, information in it is not ridiculous just one. We can say that no guide that offer you world in ten or fifteen second right but this guide already do that. So , this is certainly good reading book. Hello Mr. and Mrs. occupied do you still doubt in which?

John Ashton:

As a college student exactly feel bored in order to reading. If their teacher inquired them to go to the library in order to make summary for some guide, they are complained. Just tiny students that has reading's spirit or real their interest. They just do what the teacher want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Data Analysis Using Regression and Multilevel/Hierarchical Models (Analytical Methods for Social Research) can make you feel more interested to read.

Michael Albright:

Reading a book make you to get more knowledge from this. You can take knowledge and information from your book. Book is prepared or printed or created from each source that filled update of news. With this modern era like right now, many ways to get information are available for an individual. From media social

like newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just looking for the Data Analysis Using Regression and Multilevel/Hierarchical Models (Analytical Methods for Social Research) when you essential it?
