**Flow and Heat Transfer in Geothermal Systems: Basic Equations for Describing and Modeling Geothermal Phenomena and Technologies** Aniko Toth, Elemer Bobok

*Flow and Heat Transfer in Geothermal Systems: Basic Equations for Description and Modeling Geothermal Phenomena and Technologies* is the ideal reference for research in geothermal systems and alternative energy sources. Written for a wide variety of users, including geologists, geophysicists, hydro-geologists, and engineers, it offers a practical framework for the application of heat and flow transport theory. Authored by two of the world's foremost geothermal systems experts, whose combined careers span more than 50 years, this text is a one-stop resource for geothermal system theory and application. It will help geoscientists and engineers navigate the wealth of new research that has emerged on the topic in recent years.

- Presents a practical and immediately implementable framework for understanding and applying heat and flow transport theory
- Features equations for modelling geothermal phenomena and technologies in full detail
- Provides an ideal text for applications in both geophysics and engineering

### **From reader reviews:**

#### **Verna Smith:**

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to learn everything in the world. Each publication has different aim as well as goal; it means that guide has different type. Some people sense enjoy to spend their time for you to read a book. They are reading whatever they get because their hobby is definitely reading a book. Consider the person who don't like reading through a book? Sometime, person feel need book whenever they found difficult problem or exercise. Well, probably you should have this Flow and Heat Transfer in Geothermal Systems: Basic Equations for Describing and Modeling Geothermal Phenomena and Technologies.

#### **Ashley Parra:**

The e-book with title Flow and Heat Transfer in Geothermal Systems: Basic Equations for Describing and Modeling Geothermal Phenomena and Technologies has lot of information that you can understand it. You can get a lot of profit after read this book. That book exist new knowledge the information that exist in this book represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. This specific book will bring you inside new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read this anywhere you want.

#### **Anna Cooper:**

Flow and Heat Transfer in Geothermal Systems: Basic Equations for Describing and Modeling Geothermal Phenomena and Technologies can be one of your beginner books that are good idea. All of us recommend that straight away because this reserve has good vocabulary that could increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The copy writer giving his/her effort to set every word into delight arrangement in writing Flow and Heat Transfer in Geothermal Systems: Basic Equations for Describing and Modeling Geothermal Phenomena and Technologies yet doesn't forget the main place, giving the reader the hottest as well as based confirm resource facts that maybe you can be among it. This great information may drawn you into brand-new stage of crucial considering.

#### **Rose Miller:**

You can spend your free time to study this book this e-book. This Flow and Heat Transfer in Geothermal Systems: Basic Equations for Describing and Modeling Geothermal Phenomena and Technologies is simple to bring you can read it in the park your car, in the beach, train in addition to soon. If you did not have got much space to bring the particular printed book, you can buy the e-book. It is make you easier to read it. You can save the particular book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.
