The Paralysis in Energy Decision Making: European Energy Policy in Crisis Malcolm Grimston

This analysis of decision-making in the energy field, especially electricity in the UK and Western Europe, provides a critique of the various claims that are made for different ways of approaching the critical need for vast amounts of new investment. It explores reasons for the paralysis in decision-making, which is contrasted with past periods of rapid change, including the growth of electricity and renewables in the late 19th century, the development of centralised grids in the 1920s and 1930s and the rapid deployment of nuclear power in the 1970s and 1980s. The UK faces a potential crisis in investment in its power infrastructure just as the need for new electricity-generating capacity is becoming urgent. Over the next decade or so the majority of its existing power stations are likely to have reached the end of their operating lives yet very little new reliable capacity is being built to replace it and a government decision to build new nuclear power stations announced in early 2008 had produced no fruit eight years later. This book briefly reviews the history of each major fuel then considers the reasons for the decision sclerosis and suggests possible ways out of it. It reviews the difficulties of investing in long-term electricity generating capacity in competitive marketplaces; the problems caused by a lack of understanding of basic physics among elected representatives coupled with a degree of short-term political opportunism; the fundamentally dishonest approach of the Big Green industry; a naïve approach to communication on the part of the energy industry itself and a lax approach to scientific rigour among those advocating action against climate change which has bred disillusionment and suspicion. Comparisons with recent experience in Germany and Japan are offered to illustrate the issues.

From reader reviews:

Antonio Duncan:

The book *The Paralysis in Energy Decision Making: European Energy Policy in Crisis* can give more knowledge and information about everything you want. Exactly why must we leave the best thing like a book *The Paralysis in Energy Decision Making: European Energy Policy in Crisis*? Wide variety you have a different opinion about e-book. But one aim that book can give many details for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or facts that you take for that, you are able to give for each other; you could share all of these. Book *The Paralysis in Energy Decision Making: European Energy Policy in Crisis* has simple shape however you know: it has great and massive function for you. You can appear the enormous world by start and read a reserve. So it is very wonderful.

Keith Smith:

Reading a publication tends to be new life style on this era globalization. With reading you can get a lot of information that could give you benefit in your life. With book everyone in this world can easily share their idea. Publications can also inspire a lot of people. A lot of author can inspire their own reader with their story or perhaps their experience. Not only situation that share in the books. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors on earth always try to improve their ability in writing, they also doing some research before they write for their book. One of them is this *The Paralysis in Energy Decision Making: European Energy Policy in Crisis*.

Robert Caceres:

People live in this new day time of lifestyle always attempt to and must have the free time or they will get large amount of stress from both everyday life and work. So , when we ask do people have spare time, we will say absolutely of course. People is human not just a robot. Then we ask again, what kind of activity are there when the spare time coming to a person of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative inside spending your spare time, typically the book you have read will be *The Paralysis in Energy Decision Making: European Energy Policy in Crisis*.

Michael Kruger:

Your reading 6th sense will not betray you actually, why because this *The Paralysis in Energy Decision Making: European Energy Policy in Crisis* publication written by well-known writer we are excited for well how to make book that can be understand by anyone who have read the book. Written inside good manner for you, still dripping wet every ideas and writing skill only for eliminate your own personal hunger then you still doubt *The Paralysis in Energy Decision Making: European Energy Policy in Crisis* as good book not merely by the cover but also with the content. This is one reserve that can break don't evaluate book by its include, so do you still needing an additional sixth sense to pick this specific!?! Oh come on your looking at

sixth sense already told you so why you have to listening to an additional sixth sense.
